Summary

Computer Science student with a foundation in software testing and problem analysis. Skilled in manual testing, test case design, and defect tracking, with programming in C++, Java, and Python. Detail-oriented with strong knowledge of OOP, data structures, and SDLC, focused on delivering high-quality software.

Experience

QA & Automation Tester Engineer - QESTIT Group · Internship Jan 2026 – Feb 2026

- Test automation using Selenium and Playwright to improve efficiency and coverage.
- Performed JMeter performance testing and secure code reviews with QA and development.

Cyber Security Trainee - National Telecommunication Institute (NTI) Sep 2025 – Nov 2025

- Completed intensive training in penetration testing and network security, working with IDS/IPS systems, pfSense firewalls, and digital forensics tools.
- Gained hands-on experience with MITM and DNS spoofing attacks and their defenses.

React Frontend Web Developer – Digital Egypt Pioneers Initiative (DEPI) Jun 2025 – Dec 2025

- Participated in a national Front-End Web Development initiative using ReactJS and built real-world web applications aligned with digital transformation goals.
- Gained professional training experience in modern frontend technologies and workflows.

Projects

DemoBlaze Testing (Automation) 2026

- Designed and automated end-to-end Selenium test scenarios for an e-commerce platform, covering authentication, product selection, cart, and checkout workflows.
- Applied test design best practices, synchronization, and debugging while simulating real user journeys to improve reliability and maintenance.

DNS Spoofing Attack (Cybersecurity) 2025

- Built a MITM/DNS spoofing lab using Kali Linux, Ubuntu, and pfSense with QA testing and traffic analysis.
- Delivered test documentation, results analysis, and mitigation reporting with IDS/IPS validation.

Tech Store – E-Commerce Web Application 2025

- Built a React e-commerce platform and applied testing and QA practices to improve reliability and user experience.

Penetration Testing – Network & Web Security 2025

- Penetration Testing with Kali Linux, traffic analysis, and Snort/Suricata rule development with QA validation and reporting.

Education

Cairo University – Faculty of Computers and Artificial Intelligence 2024 - 2028

Sophomore | GPA: 3.18 / 4 | Giza, Egypt

Skills & abilities

Programming Languages: C++, Java, Python, HTML/CSS, JavaScript

Tools & Technologies: Git, Docker, Qt, Figma, cava, Excel, Power Bi, SQL Server, Software Testing

Technical Skills: Software Testing, Quality Assurance, OOP, Data Structures, Discrete Mathematics, Statistics, Web Development, Debugging, Error Handling (Defensive Programming), Test Case Design, Bug Reporting

Soft Skills: Problem Solving, Teamwork, Fast Learning, Creative & Critical Thinking, Communication, Planning.

Languages

Arabic – Native

English – Intermediate (B1)

French – Pre-Intermediate (A2)
